## IRONSPACE UNITES BY THE ENVIRONMENT.

IronSpace is a marketer of construction items that have sought the implementation of environmentally friendly products. One of these is cement, studies agree to generate pollution levels by the production of this, therefore, IronSpace recommends that the cement is replaced by cork.

Researchers explain that the production of cement in addition to generating waste of water, creation of aggregates, and large consumption of energy by factories in the process of making cement, causes damage to the environment can be seen reflected in the atmosphere since the Dust emission in the air is emitted and passes to plants and trees, preventing photosynthesis from taking place in a normal way.

IronSpace is in charge of commercializing the cork sheets for the construction of houses and do not worry, according to studies by the University of Extremadura, cork is less dense than traditional cork, which is why it is more durable in the event of an earthquake and adheres better than traditional cement that apart from its chemical components causes damage to the environment.

For more information about the project, I suggest listening to our podcast about our company and other research projects that have been carried out.

## NATURAL SKIN LTDA

### THE SKIN YOU ARE LOOKING FOR NATURALLY

WHAT DID YOU LEARN? WHAT IMPACT DOES IT HAVE? Natural Skin, a project more than a given job or a compulsory job, the truth has been denying the truth of all this, it is more teaching than a job, being able to cooperate as a team, receive knowledge and also learn for the future has been an unforgettable experience that I have had in 2021 and that will be like that for the rest of my life. We will always be recommending our company as # 1 when it comes to pricing. We will be demanding and at the same time insisting to the clients in case of any inconvenience, we are mainly concerned about the quality and the service they receive. We appreciate all the trust placed in us, remember that we are Natural Skin.

**Author's comment:** From this project I have learned how difficult it is to create a company, but also how enriching the experience can be, showing us different ways to help people and the planet.

## THE REALITY OF THIS PROJECT. FOREGROUND. INTERVIEW WITH PAULA BOHORQUEZ

I have blamed my school for almost two years for making me study a subject which I do not feel comfortable and happy about. I am not going to apologize for the bad attitude I have had all this time, however, I have to admit that actually, I do learn something.

Having considered improvement are needed by me in order to obtain the high school qualification, I have been improving my responsibility. Moreover, even when the teacher had given us the opportunity to choose workmates by ourselves, I learned how to work alone and meliorate by myself. Sometimes I felt it is too much for me, nevertheless in the end I accomplished all the objectives of the subject and it helped me to raise my self-esteem and to make the most of my time.

Furthermore, I learned something really valuable. Instead of being disgusted with an activity, you have to do, I recommend enjoying the experiences life gives to you and I invite you to take the best of it.
